SKILLS

- Unity Game Development
- Mobile Game Development
- Gameplay Programming
- Multiplayer Game Development
- XR / VR Development
- WebGL Development
- Cross-Platform Development
- Performance Optimization
- Unity Editor Tool Development
- Custom Editor Scripting
- AI Behavior Trees
- Animation Systems
- Animation Rigging
- Object-Oriented Programming (OOP)
- Design Patterns
- Event-Driven Architecture
- Debugging & Profiling
- Build Automation
- REST API Integration
- Agile Development
- Problem Solving

Unity Game Developer with 5+ years of experience building mobile, multiplayer, WebGL, XR, and VR applications using Unity and C#. Skilled in gameplay programming, performance optimization, editor tool development, and scalable architecture. Passionate about creating polished, high-performance interactive experiences and solving complex technical challenges.

EXPERIENCE

Game Developer

Meta Design Solutions: Gurugram - June 2025 - Now

- Developed and maintained interactive learning applications using **Unity, C#, PICO VR, and WebGL**.
- Designed scalable, reusable architectures to improve maintainability and accelerate development.
- Built custom **Unity Editor tools** to automate content creation, validation, and developer workflows.
- Optimized **WebGL** applications for improved performance, memory usage, and loading times.
- Implemented multimedia systems and automated build workflows to streamline deployment.
- Contributed to a **.NET-based internal tool** by implementing new features, resolving bugs, and improving code quality.
- Led R&D initiatives to evaluate and implement **VR Kiosk Mode** solutions for enterprise deployments.
- Collaborated with designers, QA engineers, and developers to deliver high-quality interactive applications.
- Received the **Star of the Month** award for outstanding technical contributions and performance.

Game Developer

Ediiie: Gurugram - September 2024 - June 2025

- Developed multiplayer gameplay systems using **Photon** for synchronized networked gameplay.
- Implemented **AI Behavior Trees** to create intelligent and adaptive non-player characters (NPCs).
- Integrated **Photon Kinematic Character Controller (KCC)** for smooth, accurate, and responsive multiplayer character movement.
- Optimized multiplayer synchronization to improve gameplay responsiveness across networked environments.
- Collaborated with cross-functional teams to refactor and optimize the codebase, reducing technical debt and improving maintainability.
- Contributed to debugging, performance optimization, and feature enhancements throughout the development lifecycle.

Game Developer

Animo: Bangalore - December 2023 - March 2024

- Led the development of custom animation solutions for **MetaHuman** characters using **Unity Animation System** and **Animation Rigging**.
- Optimized communication between **Unity** and **Node.js** to improve real-time animation performance and reduce latency.
- Implemented realistic character animations using **custom animation data**, **blend shapes**, and procedural animation techniques.
- Designed and developed a **modular event-driven architecture** using **Unity Events** and **Scriptable Objects** to improve scalability and reduce system dependencies.
- Collaborated with cross-functional teams to integrate animation pipelines and ensure seamless runtime performance.

TOOLS & TECH

Game Engine
- Unity 3D

Programming
- C#
- .NET
- Node.js

Multiplayer
- Photon Fusion
- Photon PUN
- Kinematic Character Controller
- PICO SDK
- OpenXR
- XR Interaction Toolkit

Animation
- Mecanim
- Animation Rigging
- Cinemachine
- Timeline
- Blend Shapes

Unity Technologies
- UI Toolkit
- Scriptable Objects
- Addressables
- Unity Events
- Unity Profiler
- Memory Profiler

Version Control & IDE
- Git
- GitHub
- Perforce
- Visual Studio
- Rider

Platforms
- Android
- iOS
- WebGL
- Windows
- macOS

EDUCATION

BCA: Amity University

LANGUAGES

English
Hindi

- Enhanced code maintainability and reusability through modular system design and best development practices.

Game Developer

Magnimus Systems: Bangalore - July 2023 – December 2023

- Developed an **XR fitness application** from the ground up by gamifying exercise routines, reaching thousands of potential users.
- Designed and implemented engaging **gameplay mechanics** and interactive features for multiple XR experiences.
- Built custom **Unity Editor tools** and development scripts to streamline workflows and improve team productivity.
- Optimized application performance by debugging, profiling, and resolving gameplay and system issues.
- Created in-game **cinematics** using **Unity Cinemachine** and **Timeline** to enhance user engagement.
- Collaborated with cross-functional teams to deliver high-quality, immersive XR experiences on schedule.

chine and timeline.

Associate Game Developer

Blueberry fun: Jaipur - April 2022 – June 2023

- Developed mobile games from the ground up using **Unity** and **C#**, implementing core gameplay systems and mechanics.
- Debugged and resolved gameplay and technical issues to improve application performance, stability, and user experience.
- Built and deployed games across **Android**, **iOS**, and **WebGL** platforms.
- Contributed to the development of a **Unity-based gaming hub** capable of hosting and managing over **100 games**.
- Implemented features for dynamic game downloading, launching, and content management within the application.
- Integrated **REST APIs** to fetch and synchronize user data, enabling seamless backend communication.
- Collaborated with cross-functional teams to deliver optimized, scalable, and maintainable game

Game Developer Intern

Nine Hertz: Jaipur - July 2020 – December 2020

- Assisted in the development of **2D platformer games** using **Unity** and **C#**.
- Collaborated with senior developers to implement **core gameplay mechanics**, player controls, and game features.
- Debugged and resolved gameplay issues to improve functionality and overall player experience.
- Gained hands-on experience with **Unity development workflows**, object-oriented programming, and version control.
- Applied industry-standard game development practices to deliver polished, high-quality game features.
- Participated in team discussions, code reviews, and feature implementation throughout the development lifecycle.
